

What is the SKILLS project?

SKILLS, *Several Keys in Learning to Learn Skill* is a project funded with support from the European Commission within the framework of the Lifelong Learning Programme, sectoral sub programme Grundtvig.

Its purpose is to develop the *learning to learn* competence and a series of tools to help the educators and the learners improve their competence:

- Analysis of the Portfolio Methodology
- Description and implementation of the competence
- Analysis of learning styles and strategies
- Test and computer applications:
 - To measure level of competence
 - To find out one's learning style
- Portfolio for learner and Notebook for educator
- Task-based activities

SKILLS

What does the SKILLS project offer you?

If you are learning...

3 theoretical approaches for the understanding of the *learning to learn* competence:

1. Analysis of the Portfolio Methodology
2. Analysis of the competence itself
3. Analysis of leaning styles and strategies

Examples of task-based activities to help your learners improve their *learning to learn* competence and make the most of their learning styles. These examples will help you to develop your own task-based activities specifically aimed at your learners

Examples of task-based activities to help you improve your *learning to learn* competence

Computer application to help you find out your learners' level of *learning to learn* competence

Computer application to help you find out your learners' learning styles

If you are teaching...

A Notebook to help you evaluate your learners, design tasks and plan your teaching

Computer application to help you find out your level of *learning to learn* competence

Computer application to help you find out your learning style

A Portfolio for you to record and evaluate your *learning to learn* progress and to help you plan your future learnings
